- › Communication

- **MBA International Pharma**

(Sep/2024 - Oct/2024)

Designed and developed user-centric interfaces for a comprehensive Pharma Agency application, streamlining critical processes such as order management, invoice generation and downloads, tracking of pending bills, ledger maintenance, and user profile management. Focused on creating an intuitive user journey by implementing clear navigation structures, minimalistic design elements, and responsive layouts across devices.

- **Hashbyt Website**

Developed a cohesive design system for the Hashbyt Landing page, focusing on brand consistency, user engagement, and clear communication of services. Created engaging posts and visual content to enhance online presence.

Small Projects

- **Weather Forecast Application**

(Oct/2024 - Oct/2024)

Developed an interactive and responsive weather forecasting platform using **Flutter** and the **OpenWeather API**. Integrated real-time weather updates, city-based searches, and detailed weather parameters such as temperature, humidity, and wind speed. The application features a visually appealing interface and ensures secure API key management. Hosted on Netlify for smooth deployment and accessibility.

- **BMI Calculator Application**

(march/2024 - june/2024)

Designed and developed a sleek and interactive BMI Calculator application using **Flutter**. The app allows users to input their height and weight to calculate their Body Mass Index instantly. Features include a clean UI, real-time BMI categorization (underweight, normal, overweight, etc.), and smooth cross-platform performance. Hosted on Netlify to ensure easy accessibility and sharing.

EXTRACURRICULAR ACTIVITIES

- Organized our colleges national level event Techfest.
- Coordinated College TechnoPlanet Event
- Volunteer & Coordinator in Convocation
